In-Home Training Pricing Sheet

Puppy “Right Start” Consultation (puppies 8 to 18 weeks) \$135

An up-to two-hour consultation giving you the tools and confidence to raise a well-balanced and behaved puppy. Discussion includes important developmental stages, how to appropriately interact with the pup, housetraining, use of crates, leash use beyond walking, and behaviors such as destructive chewing, biting, demand barking, etc. By the end of the consultation, you will have the tools and confidence needed to raise a well-balanced and well-behaved dog!

Initial Consultation \$60 (or free*)

The best training programs are ones tailored to your specific needs, environments and circumstances. If your training goals reach beyond basic obedience (i.e., see Behavior Modification and Fears, Anxieties and/or Aggression below), we require an initial consultation to review finer details and ensure that we are addressing your needs. We will also begin to troubleshoot some issues and discuss what you can begin doing right away. Each consultation comes with a tailored training program that will serve as your guideline, as well as 30 days of email support. (**The \$60 fee for the consultation is waived with the purchase of a training package.*)

Individual Hourly Sessions \$70

Obedience – Basic (5 One-Hour Sessions) \$300

Obedience – Advanced (10 One-Hour Sessions): \$550

Is it time for your pup to learn something new? Maybe the basics, maybe a little more? The obedience training packages focus on the foundational elements of good dog behavior – sit, down, stay, come, loose-leash walk, etc. Always using positive, reward-based methods, this is a fun way to teach your dog what you'd like and to have quality and active interaction with him as well.

Behavior Modification – 5-Pack \$375

Behavior Modification – 10 Pack \$700

Is your dog misbehaving? Maybe a little? Maybe a lot? We all love our dogs, but we must understand that nobody is perfect. But, knowing when to ask for help will benefit your dog's life, your life, and perhaps the lives of others in the community. After the required initial consultation, you will receive a tailored training program based on your goals for your dog. This program will act as your guideline as we instruct you on methods of training, management, prevention and counter-conditioning. The amount of sessions required varies depending on several factors, all of which will be determined in the consultation.

Fears, Anxieties and/or Aggression - 10-Pack \$850

Addressing more severe behaviors that may ultimately be not just scary for the dog and you, but dangerous or a potential liability. This program includes, but is not limited to dogs exhibiting separation anxiety, fears of strangers, fears of other dogs, environmental phobias, fears of new items/situations, human aggression (at home or away), and dog aggression. These behavioral issues can be the hardest to work, consequently making your dog difficult to own. We will instruct you on developing a plan to help the quality of your dog's life, and as a result, the quality of your life. Along with skills taught in the Behavior Modification program, you will learn methods of management, specialized desensitization, and counter-conditioning. This program is very intensive and requires at least 10 private sessions.
